2.5 MW

TYPE
Roof & Carport Mounted

MODULES
Sharp Panels

INVERTERS
PV Powered

DATE COMPLETE
Q2 2011

Project Overview

Nautilus was awarded the Medford BOE solar project and developed a 2.5 MW solar program for their school system. The project incorporates seven separate solar systems at their various facilities, including ground, rooftop, and carport systems.

“ We developed a set of criteria that we were going to evaluate the bids. Obviously cost is a major focus, but in terms of a company being able to come in and actually perform what they have laid out they're going to do, that they are going to be able to finance it, that was even more important. You have to look at the total picture, and in Nautilus, we had no question. They gave us one of the best proposals we have ever received, not only financially, but what they could do for the school district. And not only that, but they have executed on it. ”

-Bryan McGair, Asst. Superintendent of Finance, Medford Board of Education

About Nautilus Solar

Founded in 2006, Nautilus Solar Energy, headquartered in Summit, N.J. is a leading full service solutions provider for business and public sector customers across North America. Nautilus is making solar possible by developing, funding, executing and managing the physical and financial aspects of distributed generation solar electric projects. The company delivers full service financial and technical expertise by customizing the optimal solar solution to save customers money while helping them meet their sustainability goals. Nautilus has been involved in over 100 MW—both distributed and grid tied systems—of solar solutions in the United States and Canada. Nautilus is minority owned by Virgo Investment Group LLC and its affiliates, based in Redwood Shores, California. For more information, visit www.nautilusolar.com.
