¹ The discount you qualify for will be determined during the enrollment process based upon state, income level, and whether you are enrolling a home or business.

² Discounts received are based on usage up to 90 days prior, depending on how quickly your utility company provides us the information necessary for calculating your discount on the electricity charge portion of your bill. We then apply the calculated credit to the current months bill.

³ State regulations or utility company requirements will dictate if you receive a one bill summary with your net cost OR one from your utility company for total usage + one from Nautilus with your discount.
